## PROTEIN TO GO™

Whether you are a performance athlete, on a diet or you simply want to increase lean muscle mass, the Protein To Go™ shots will deliver the results you are looking for. With regular use, Protein To Go™ shots promote sustained healthy energy, development of lean muscle, quicker recovery from exercise and increased fat loss.

### INCREASE WEIGHT LOSS

Protein To Go™ can help you reach your weight loss goals. Drinking Protein To Go™ will help to create a feeling of fullness that will curb appetite and reduce the urge to snack or overeat. Clinical studies consistently show that high-protein diets increase satiety and decrease hunger compared with high-fat or high-carbohydrate diets. In a blind study conducted to evaluate whey protein for use as a dietary supplement to enhance weight loss, subjects who consumed increased whey protein lost 84% more weight AND gained 50% more lean muscle, than those consuming the standard amount of protein.

### GAIN LEAN MUSCLE

Increased consumption of whey protein is a key factor in increasing lean muscle mass. Protein To Go™ is an extremely fast-absorbing source of protein that supports the rapid growth of lean muscle. Protein shakes and drinks are full of unnecessary additives which take longer to consume and absorb. Protein To Go™ shots are small and absorbed by the body almost immediately because all the "extras" have been removed. Bottom line, if you're looking to build lean muscle then Protein To Go™ will help you achieve the results you are looking for faster.

### INCREASE ENERGY

Studies have shown that added protein provides the body with healthy, lasting energy. In fact, one study showed that a diet high in protein increased natural energy by 44%. Protein To Go™ helps increase your mental and physical energy instantly. Try our Protein To Go + Caffeine shots for an added kick of caffeine!
